Vandervort - Ankunding	91,9
Pfeffer Group	89,3

KEY INSIGHTS & RECOMMENDATIONS

1. High delivery delays

80% of orders were delayed, with an average delay of 6.53 days.

Recommendation: Investigate the causes of recurring delays and review supplier delivery performance.

2. Suppliers requiring attention

Doyle Group had a delayed-order rate of 94.4%, while Vandervort - Ankunding had 91.9%.

Recommendation: Review these suppliers' delivery reliability and agree on corrective actions.

3. Potential inventory risk

31.0% of orders had a negative cover margin, meaning actual lead time exceeded quoted lead time plus safety cover.

Recommendation: Review safety stock levels and lead-time assumptions for items supplied by frequently delayed suppliers.

4. Regional differences

Nearshore orders had an average delay of 7.95 days, compared with 6.64 days for domestic orders and 5.16 days for overseas orders.

Recommendation: Investigate why nearshore orders experienced longer average delays before making sourcing decisions.
